*I use StarrMatica on a regular basis in my fourth grade classroom.*

*My class of 16 fourth grade students were proficient in reading and science, and averaged "Advanced" on the state assessments in Math this year. StarrMatica is one of the factors in their success. We used the "Lessons" to introduce the skills, and the "Practice" for individualized practice on our mobile lab computers.*

*We have a good math series with its own games; however, I feel the StarrMatica lessons and practice are much more helpful.*

*We recently began using the lessons, practice, and testing with our RTI (Response to Intervention) groups. We focused on summarizing and decided the Starrmatica lessons kept them engaged better than many other materials we tried. It's capability for differentiated instruction is very valuable.*

*Thanks for your great program!*
