Dear Interested party of StarrMatica,

Our K-5th grade school has been using StarrMatica for over a year. The teachers have their students using the site for individual reinforcement and enrichment of particular skills. The 3rd, 4th and 5th grade classes have times in their week where they are assigned to go to the StarrMatica site to work on a skill taught during their independent work time, especially in math. Our 1st graders work with an associate in small groups during their center time.

Teachers are also teaching concepts to the whole class with the site. The activities are engaging for teaching and reinforcing the skills. StarrMatica works well with our interactive whiteboards! The Resources section provides quality, reliable websites to use.

Our students were given their own password for access at school and at home. Parents know their children are using an educationally sound, safe site. It has the look and feel of "games" but with educational material.

We have found the creator of this online resource, Emily Starr, to be very helpful. She is always available for any questions or trainings we need addressed.

Our school would highly recommend you to try this resource. Your students and teachers will love it!

Barb Roling, Principal
